^{*) +/- 15% **)} Modeled value

- Values measured from bottom of pipe.
- Tests performed at room temperature (16-20°C).

Max Flow	m/s	I/s
	2	36

- Higher flows requires custom valve, contact Wapro
- Flange installation is highly recommended at flows above 2 m/s

In the submerged case opening pressure [mmH2O /inH2O] is the difference between the water level upstream and the water level downstream and in the open-air case to the invert of the pipe. In vertical applications, the vertical opening pressure is measured from the outlet of the WaStop.
